Required Match & CDBG Request Calculations

CDBG Request / Non-Required Share Percentage = Total Project Cost
Required Share Percentage   X   Total Project Cost = Required Match
Total Project Cost   X   Non-Required Share Percentage = CDBG Request

Example 1:

CDBG Request: $100,000
Non-Required Share Percentage: 90%
Required Share Percentage: 10%

$100,000 / 90% =   **$111,111**   Total Project Cost
10%   X $111,111 =   **$ 11,111**   Required Match

Example 2:

CDBG Request: $250,000
Non-Required Share Percentage: 90%
Required Share Percentage: 10%

$250,000 / 90% =   **$277,778**   Total Project Cost
10%   X $277,778 =   **$ 27,778**   Required Match

Example 3:

CDBG Request: $300,000
Non-Required Share Percentage: 85%
Required Share Percentage: 15%

$300,000 / 85% =   **$352,941**   Total Project Cost
15%   X $352,941 =   **$ 52,941**   Required Match

Example 4:

Total Project Cost: $150,000
Non-Required Share Percentage: 90%
Required Share Percentage: 10%

10%   X $150,000 =   **$ 15,000**   Required Match
$150,000   X   90% =   **$135,000**   CDBG Request

Example 5:

Total Project Cost: $600,000
Non-Required Share Percentage: 85%
Required Share Percentage: 15%

15%   X $600,000 =   **$ 90,000**   Required Match
$600,000   X   85% =   **$510,000**   CDBG Request
