

EPA Post-Construction EPA Region 4 | Green Infrastructure Workshop

PELHAM, ALABAMA

DATE: MARCH 4, 2019

LOCATION: PELHAM CIVIC COMPLEX

500 AMPITHEATER ROAD

PELHAM, AL 35124

EPA Region 4, in partnership with **Alabama Department of Environmental Management and the Shelby County Development Services**, is hosting a 1-day workshop in Pelham, Alabama, March 4th, 2019, to discuss:

- Use of green infrastructure and low impact development controls as an alternative BMP for managing stormwater runoff
- Cost effectiveness and benefits derived from using green infrastructure and low impact development

The workshop will include speakers from EPA, State and local agencies discussing practices, technical application and case studies. The workshop is open to MS4s, State representatives, developers and other stormwater practitioners involved in the municipal stormwater program and interested in green infrastructure and low impact development. The **workshop is free**, but attendees need to register using the following link:

MUNICIPAL STORMWATER

For Registration and additional information contact Mike Mitchell (mitchell.michael@epa.gov) at 404.562.9303
