
2020 ANNUAL REPORT

(205) 669-3846 - Office
(205) 669-3886 - Fax

This report provides a summary and statistical analysis of the deaths that were investigated by the Shelby County Coroner's Office in the year 2020. We serve an increasing population of 213,729 and responsible for coverage of 800 square miles. Shelby County is the 6th largest county in Alabama. Our staff consists of a total staff of 5; 1 coroner and 4 deputy coroners.

The Coroner and/or Deputy Coroner are on duty 24 hours a day, 365 days a year. The Coroner's mission is to satisfy the legal requirements of the office in an expeditious manner. The primary task of the Coroner's Office is to determine the cause and manner of death of those who have died in Shelby County or in those whose traumatic event originated in Shelby County. An autopsy may be required depending upon the circumstances of the death.

The coroner and all appointed staff have authority through the Alabama Code, Section/Chapter 45-2-61.

The Coroner's Office investigates sudden, unexpected deaths, especially those that occur under violent or suspicious circumstances. Those deaths to be reported to the Shelby County Coroner's Office include all deaths occurring in Shelby County as outlined below regardless of where or when the initial injuring event occurred. In addition, all deaths as outlined below shall be reported that occurred outside of Shelby County but the initiating injuring event occurred in Shelby County.

- From disease which may be hazardous or contagious or which may constitute a threat to the health of the general public
- From external violence, an unexplained cause, or under suspicious circumstances
- Where no physician is in attendance, or where, though in attendance, the physician is unable to certify the cause of death
- From thermal, chemical, or radiation injury
- From criminal abortion
- While in the custody of law enforcement officials or while incarcerated in a public institution
- When the death was sudden and happened to a person who was in good health
- From an industrial accident or any death suspected to involved with the decedent's occupation
- When death occurs in a hospital less than 24 hours after admission to a hospital or after any invasive procedure
- Any death suspected to be due to alcohol intoxication or the result of exposure to drugs or toxic agents
- Any death due to neglect or suspected neglect
- Any stillbirth of 20 or more weeks gestational age unattended by a physician
- Any maternal death to include death of a pregnant woman regardless of the length of the pregnancy, and up to six weeks (or one year) post-delivery, even where the cause of death is unrelated to the pregnancy
- Any death of an infant or child where the medical history has not established a significant pre-existing condition
